11	Timeline & Next Steps	<i>Live in 10–15 days</i>

Who you serve — and what this site must do

Goldway Capital is **not a mortgage company, an insurance agency, or a real estate business**. It's a senior solutions company — a trusted resource that helps individuals and families navigate important decisions around Medicare, retirement planning, home financing, and real estate transitions. The website has to communicate exactly that: educational, trustworthy, professional, and consultative — a company, not a one-person sales operation.

Who we're reaching

The primary market is adults age 55+, with a focus on:

- ◆ **Turning 65 & entering Medicare.** The immediate priority for the 2026 AEP season — education, Scope of Appointment, and enrollment consultations.
- ◆ **Retirees & pre-retirees.** People planning for retirement and weighing their financial flexibility.
- ◆ **Senior homeowners.** Homeowners exploring reverse mortgage options or thinking about their next move.
- ◆ **Aging-in-place explorers.** Individuals considering downsizing, probate sales, and senior real estate transitions.

What success looks like

Your brief defines success in concrete terms. This site is built to drive each one:

Medicare consultations

booked through the site

SOA submissions

captured compliantly before any sales talk

Lead conversions

across all service lines

Agent recruiting inquiries

from the Join Our Team page

Medicare enrollments

the ultimate outcome

Resource Center & SEO growth

keeping Goldway visible

02 · THE SOLUTION

The solution at a glance

Three connected pieces, working as one system. A **WordPress website** you can update yourself, your existing **GoHighLevel CRM** connected and configured for the way you work, and a **connected admin panel** that ties them together — capturing every lead and pushing your content everywhere with a single click.

WordPress Website

A clean, senior-friendly site on WordPress — so you and your VA publish articles and edit content anytime, no developer needed.

GoHighLevel CRM

Your existing GHL account connected to the site and admin panel — pipeline stages, lead-source tags, and confirmation emails configured so it works the way you run.

Connected Admin Panel

One command center linked to both site and CRM — see every lead, follow up, and post to all social platforms in one click.

Built on your brief, scoped to your needs

Your brief was clear that Goldway **does not need a heavy, insurance-specific CRM** — producer compliance (AHIP, carrier appointments, commissions) is the FMO's job, not this system's. So everything here is built to be **simple to run day-to-day**: a lead tracker your VA can operate, basic email follow-up, and content that publishes itself across the web and social media.

“One platform. One login. Your website and your sales engine, finally in the same place.”

Service line map: performed vs. referred

Why this comes first

Your brief calls this section “**foundational**,” and it is. This table governs every page’s copy, every navigation label, and where each disclosure appears. It reflects what Goldway is actually licensed and structured to do today — so the site never implies broader direct service than what’s licensed.

Service	Status	Required Disclosure
Medicare — Advantage, Part D, Supplement, Final Expense	Performed Directly	Agency NPN disclosure; CMS marketing-guideline compliance (no implied government endorsement)
Reverse Mortgage	Directly — Specialty	NMLS number, lender sponsorship disclosure, Equal Housing Lender logo
Forward Mortgage — purchase / refinance	Referred Out	Copy must say “connect you with” or “refer” — never “we provide”
Senior Real Estate & Probate Sales	Performed Directly	Broker sponsorship disclosure; state-specific probate language as applicable
Real estate outside probate / downsizing	Referred Out	Same referral-framing rule as forward mortgage

What this changes in the navigation

- ✓ **Rename:** “Mortgage Solutions” becomes “Reverse Mortgage Solutions.”
- ✓ **Rename:** “Real Estate Solutions” becomes “Senior Real Estate & Probate Solutions.”
- ✓ **Result:** the labels themselves never overstate what’s licensed.

01 · THE WEBSITE

The website

A WordPress site designed to **establish credibility and trust with seniors**, built around life events rather than products, and easy for your team to keep current.

Navigation

Seven clear destinations, labeled exactly per the Service Line Map:

> Home

> Medicare Solutions

> Reverse Mortgage Solutions

> Senior Real Estate & Probate Solutions

> Resource Center

> Medicare Agent Opportunities

> Contact

Homepage messaging

HEADLINE

Helping Seniors Navigate Important Life Decisions

SUBHEADLINE

Whether you're turning 65, planning for retirement, exploring home financing options, or considering your next move, Goldway Capital provides guidance tailored to your unique situation.

CALLS TO ACTION

Primary: Schedule a Medicare Consultation Secondary: Schedule a Senior Solutions Consultation

Content & branding direction

- ✓ **Voice:** life-event focused, not product focused — leading with questions like “Turning 65?”, “Planning Retirement?”, “Need More Financial Flexibility?”, and “Thinking About Downsizing?”

- ✓ **Imagery:** relatable senior lifestyle imagery throughout — warm, real, and respectful.
- ✓ **Tone:** educational, trustworthy, professional, consultative — Goldway presented as a company with real infrastructure and process.
- ✓ **Honesty:** the About/Team page conveys systems, partners, and a training pipeline honestly — without implying staff that doesn't exist yet.
- ✓ **Accuracy:** “we” language is avoided on pages describing services only one licensed individual delivers (e.g. reverse mortgage) — framed as the company's specialty delivered by its founder/specialist.

Disclosures & compliance, built in

Compliance isn't added after the copy is written — it's **designed into every service-page template from the start**, exactly as your brief requires.

Disclosure architecture

- ✓ **Homepage:** stays clean — mission, who Goldway helps, and the three service areas. No licensing clutter up front.
- ✓ **Service pages:** licensing and compliance disclosures live on each individual service page, as a required, designed-in template element.
- ✓ **Per page:** each page carries its own disclosure block per the Service Line Map — NPN for Medicare; NMLS, lender sponsorship and Equal Housing Lender logo for reverse mortgage; broker and probate language for senior real estate.

CMS compliance guardrails

These are treated as hard publishing rules, enforced in how the site and content workflow are set up.

- ✓ **No implied endorsement.** No language implying Medicare or government endorsement, sponsorship, or affiliation — anywhere on the site.
- ✓ **Required disclaimers.** Any Medicare Advantage or Part D content carries the required disclaimers, confirmed against current CMS marketing guidelines before publishing.
- ✓ **SOA before the sale.** Any lead form tied to Medicare Advantage / Part D supports Scope of Appointment documentation in the workflow behind it — SOA is completed before a sales conversation, never after.
- ✓ **Reviewed copy.** Medicare-page copy is written with insurance-marketing experience or compliance-reviewed before it goes live.

Forms & the data-boundary rule

Five forms feed your CRM, each **tagged by source** so you always know where a lead came from.

The five website forms

1

Medicare · tag: Medicare

From the Medicare Solutions page — routes into the Medicare pipeline.

2

Final Expense · tag: Final-Expense

Captured and tagged separately for final-expense follow-up.

3

Reverse Mortgage · tag: Reverse-Mtg

From the Reverse Mortgage Solutions page — the company specialty.

4

Probate / Senior Real Estate · tag: Probate

From the Senior Real Estate & Probate page.

5

Join Our Team · tag: Recruiting

Agent recruiting inquiries — tagged separately and routed to the owner.

Hard requirement — no health information in the CRM

No medical, health, or coverage information is ever collected in a website form field or stored in the CRM — not in a field, note, call log, or email thread, not even basic coverage status beyond a simple yes/no. **The CRM holds contact information and scheduling status only.** All health- and enrollment-related information is handled exclusively inside the FMO/carrier enrollment portal, entirely outside this website and CRM. Every form field is designed with this boundary in mind.

GoHighLevel CRM & the admin panel

Your existing **GoHighLevel CRM** will be connected to a dedicated **admin panel** — the single place your team logs in to run the day. The WordPress website feeds it automatically; you operate everything from one screen. We configure it around your workflow so it's **ready to use**, with every form wired in and the pipeline set the way your brief specifies.

What we connect & configure in GoHighLevel

- ✓ **Pipeline stages, ready to go.** The full lead pipeline set up with the simple stages your brief specifies — so the VA can work leads from day one.
- ✓ **Lead-source tagging.** Every form wired in and tagged (Medicare, Final Expense, Reverse Mortgage, Probate, Recruiting) so each lead is sorted automatically.
- ✓ **Automated confirmation emails.** A simple confirmation/scheduling email fires when someone submits — no manual setup later.
- ✓ **Email follow-up & call logging.** The VA sends follow-up and scheduling emails and logs calls and notes, all from the panel.
- ✓ **Owner's at-a-glance view.** A dashboard showing what's outstanding across every lead source in one look.

The lead pipeline

Simple by design — exactly the four statuses your brief asks for, shown as a visual board. Move a lead's card forward as it progresses:

1

New

A form is submitted on the site. The lead lands here automatically, tagged by source — no manual entry.

2

Contacted

The VA has made first contact, logged the call or email, and set a follow-up reminder.

3

Appointment Set

A consultation is scheduled. For Medicare, the SOA is completed first, in the compliant workflow.

**Closed**

The consultation is complete and the outcome recorded. The contact stays for future follow-up and referrals.

One-click publishing to every platform

This is the part that keeps Goldway visible without extra work. From the admin panel, you write a post once and **publish it simultaneously to all your platforms with a single click** — the website article and Facebook, Instagram, LinkedIn, and more, all at once.

Write once. Publish everywhere. One click.

Connected social accounts · scheduling · the website blog — all posted together from the panel.

Kept deliberately simple

Per your brief, the admin panel is built to be **easy for a non-technical owner and VA to run** — it deliberately does not try to be an insurance back office. Here's exactly where the line sits:

✓ What it does

- ✓ Captures and tags leads from all five forms
- ✓ Tracks each lead through four simple statuses
- ✓ Sends follow-up & scheduling emails; logs calls
- ✓ Posts content everywhere in one click
- ✓ Gives the owner one at-a-glance view

✗ What it doesn't

- ✗ Track AHIP, SOA forms, carrier appointments or commissions — that's the FMO
- ✗ Run a multi-step agent onboarding workflow
- ✗ Automate any insurance-specific compliance
- ✗ Store any medical, health or coverage information

Recruiting inquiries simply route to the owner for the dedicated weekly review (currently Tuesday/Thursday); everything after initial inquiry — licensing verification, FMO appointment, agreements — happens outside the website, exactly as you specified.

Content, SEO & social

A core goal of this site is keeping Goldway's name visible through regularly published articles — pushed to the website and social media, **without a developer for every post.**

Self-publishing on WordPress

- ✓ **Independence:** WordPress means you or your VA log in and post an article directly — no developer in the loop, ever.
- ✓ **Resource Center:** structured as a growing library of senior-focused educational content that builds trust and SEO over time.
- ✓ **Distribution:** from the admin panel, a published article pushes out to Facebook, Instagram, LinkedIn and more in one action — no manual posting platform-by-platform.

Three months of SEO

Included in this engagement is three full months of search optimization to grow Goldway's visibility for senior-solutions searches:

- ✓ **Technical foundation.** The WordPress site is built to Google's standards — fast, mobile-friendly, properly structured, and clean.
- ✓ **Keyword strategy.** We target the phrases your market actually searches — Medicare, reverse mortgage, senior downsizing and probate — by service and locality.
- ✓ **On-page optimization.** Each key page is optimized: titles, descriptions, headings, and content tuned to rank and to convert seniors into consultations.
- ✓ **Local SEO.** Goldway is positioned to appear for local searches and in Google's local map results.
- ✓ **Resource Center as an engine.** Your blog becomes an ongoing SEO asset — each article helps you rank for more terms.
- ✓ **Tracking & reporting.** Analytics and search tools are installed so you can watch traffic, rankings, and leads grow month over month.

A note on expectations

SEO compounds — it's a foundation that builds over the three months and keeps working afterward, because you own the optimized site and every article published to it.

09 · SETUP & PROTECTION

Email, domain & ownership

Email & domain — handled safely

- ✓ **Microsoft 365 stays as-is.** Goldway's professional email already runs on Microsoft 365 at the company domain. It stays exactly where it is — nothing migrated.
- ✓ **Shared leads mailbox.** A shared mailbox (e.g. leads@goldwaycapital.com) is set up inside the existing Microsoft 365 account, with delegated access so the VA manages follow-up without the owner's personal inbox credentials.
- ✓ **MX records protected.** Hosting and email both depend on the domain's DNS. We do not alter MX records when configuring hosting/DNS — and we confirm this with you explicitly before any DNS change is made.

Ownership & copyright

You own everything, in writing

Once the project is paid in full, Goldway Capital owns the finished website outright — **all final copy, design, images created for the site, and the underlying code.** These terms are put in writing before the project is awarded.

- ✓ **Full ownership on final payment.** The developer retains no ownership or licensing rights over the finished product.
- ✓ **No reuse elsewhere.** Goldway's specific page copy, compliance layout, and branded design elements are not reused in other clients' projects.
- ✓ **Portfolio by permission only.** Showcasing the finished site in a portfolio or case study requires Goldway's separate written permission — never automatic.
- ✓ **Properly licensed assets.** Any stock photography, fonts, or third-party assets are licensed for commercial use, with that licensing transferring to or already cleared for Goldway.
- ✓ **Footer copyright notice.** A standard notice — "© 2026 Goldway Capital. All rights reserved." — appears in the footer on every page, with the year-handling approach confirmed with you.

Investment

Everything in this proposal — the WordPress website, the full GoHighLevel CRM build, the connected admin panel with one-click social posting, the compliance architecture, email and domain setup, and three months of SEO — is included in a single price. **No hidden fees, no surprise add-ons.**

THE COMPLETE GOLDWAY PROJECT

\$2,500

one-time · everything below included

Everything included for \$2,500

- ✓ WordPress website — senior-friendly, life-event focused, self-publishing after launch
- ✓ Seven pages with navigation labeled accurately per the Service Line Map
- ✓ Compliance & disclosure architecture designed into every service-page template
- ✓ CMS guardrails for Medicare/CMS-compliant publishing, including SOA-before-sale workflow
- ✓ Five lead forms (Medicare, Final Expense, Reverse Mortgage, Probate, Join Our Team), each source-tagged
- ✓ GoHighLevel CRM connected & configured — pipeline stages, lead-source tags, confirmation emails
- ✓ Connected admin panel — lead tracker, follow-up & call logging, owner's at-a-glance view
- ✓ One-click simultaneous publishing to the website and all connected social platforms
- ✓ Resource Center setup as an ongoing SEO and trust asset
- ✓ Email & domain setup — shared leads mailbox in Microsoft 365, MX records protected
- ✓ Three full months of SEO — technical, on-page, local, and content optimization
- ✓ Full ownership — site, code, design & content are yours, in writing, on final payment

On scope

Dedicated mortgage-lender program sections (Residential, Commercial, Business & Hard-Money) are **intentionally excluded as out of scope** — they don't reflect Goldway's senior-solutions model or the Service Line Map. Producer-compliance systems (AHIP, SOA tracking, carrier appointments, commissions) remain with the FMO and are not part of this build.

II · GETTING STARTED

Timeline & next steps

The full build — website, CRM, admin panel, and everything above — is delivered in **10–15 days**. The three-month SEO engagement begins at launch.

The 10–15 day build

Days 1–3	Setup & Structure Confirm the Service Line Map, disclosures, and DNS rules (MX protected); set up WordPress and lock structure.
Days 4–9	Build & Compliance Build all seven pages with senior imagery, the compliance/disclosure blocks, and five source-tagged forms.
Days 9–13	CRM & Admin Panel Connect your GoHighLevel CRM to the admin panel, configure the pipeline and tags, and wire up one-click social posting and the mailbox.
Days 13–15	Review, Test & Launch Load content, complete on-page SEO, test every form and the data-boundary rule, and launch.

To get started

- ◆ Approve this proposal and confirm the ownership terms in writing before the project is awarded.
- ◆ Short kickoff: confirm the Service Line Map, GoHighLevel access, and Microsoft 365 details (so MX records stay untouched).
- ◆ We begin the build — and you’re live within 10–15 days.

GOLDWAY CAPITAL

A SENIOR SOLUTIONS COMPANY

A trusted resource for seniors — online.

Built exactly to your brief: accurate, compliant, and simple to run.

Medicare · Reverse Mortgage · Senior Real Estate & Probate
